**DETAILED ACTION**

1. Claims 1-32 are presented for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Jeyaraman (US 6,311,187 B1).

4. As per claim 1, Jeyaraman teaches the invention as claimed including a transmitting apparatus [col. 1, lines 17-22], comprising:

transmitting means [104, Fig. 1] for transmitting the same contents of update information a plurality number of times, the update information [230, Fig. 2] representing that data has been updated [col. 2, lines 16-18; col. 5, lines 14-16],

wherein the transmission timing of the same contents of the update information transmitted by said transmitting means is designated corresponding to operating state

information [120, Fig. 1] of receiving means [106, Fig. 1] that receives the update information from said transmitting means [col. 2, lines 1-24; col. 5, lines 6-16].

5. As per claims 2 and 3, Jeyaraman teaches the transmission timing is a time zone in which the update information is transmitted [col. 7, lines 20-24].

6. As per claims 4-6, Jeyaraman teaches the transmitting apparatus is a transmitting device for transmitting a hierarchical structure of a directory for hierarchically managing locations of contents data [col. 1, lines 17-22], comprising:

managing means for managing a hierarchical structure of a directory [Fig. 6A-6K] composed of a container entry [D, Fig. 6A] and a leaf entry [Se, Fig. 6A], a container entry containing information in the immediately lower hierarchical level thereof, a leaf entry being disposed in the immediately lower hierarchical level of a container entry, a leaf entry not containing information in the immediately lower hierarchical level thereof [col. 8, lines 14-29];

detecting means for detecting a change of the hierarchical structure of the directory managed by said managing means and obtaining first difference information and second difference information corresponding to the detected result [col. 2, lines 10-12; col. 5, lines 7-8], the first difference information being the difference of container entries, the second difference information being the difference of leaf entries [col. 9, line 40 – col. 10, line 15; col. 406, Fig. 4; col. 14, lines 44-46]; and transmitting means for transmitting third difference information for reproducing the hierarchical structure of the

Art Unit: 2154

directory at a predetermined time period along with the first difference information and the second difference information [408, Fig. 4; col. 2, lines 13-16; col. 14, lines 47-51],

wherein the predetermined time period is variably designated corresponding to the operating state information of a receiving side [120, Fig. 1; col. 7, lines 19-24].

7. As per claims 7-10, Jeyaraman teaches the third difference information is composed of information of container entries of the hierarchical structure of the directory and leaf entries in the immediately lower hierarchical level of each of container entries [col. 2, lines 13-16] and a predetermined time period [col. 7, lines 20-24].

8. As per claims 11 and 12, since they are method claims of claims 1 and 4, they are rejected for the same basis as claims 1 and 4 above.

9. As per claims 13-19, since they introduce the same limitation as claims 1 and 4-10 from different prospective respectively [i.e., receiving side], they are rejected for the same basis as claims 1 and 4-10 above.

10. As per claim 20, since it is a method claim of claim 13, it is rejected for the same basis as claim 13 above.

Art Unit: 2154

11. As per claims 21-32, since they are system and method claims of combination of claims 1, 4-10 and 13-19, they are rejected for the same basis as claims 1, 4-10 and 13-19 above.

### ***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

DeVries (US 5,721,914) discloses a Hierarchical structured data distribution system;

Chow et al. (US 6,029,175) discloses a system for automatically updating file;

Jeyaraman (US 6,377,957) discloses a system for updating a Hierarchical structured data;

Saether et al. (US 6,405,219) discloses a system for updating file content; and  
Bienvenu et al. (US 6,526,438) discloses a distributing system.
